

"I love you too"

Mama

At this difficult moment in my life I want to write a line to my Angel Tess. It is very difficult to say goodbye to such a beautiful, wonderful, intelligent daughter and angel that I will remember with that beautiful smile that showed life. Her mother, family and friends there are no words to describe my love for you despite the distance.

I have accepted your early departure as other decisions that you made and respected in the past.

I know, and I am sure that right now you are in the place you decided to be, in a new place as beautiful as you Angel Tess, a place full of peace and tranquility. I want you to know that you will always have a very special place in my heart, anywhere I am.

I have been visiting the park in front of where I live the same one you met on your visit for two days and I can feel you in every tree on every leaf on every bird flight.

I know and I am sure you will always be with us and one day we will have our reunion.

I accept your flight to go to the most beautiful area to that new place full of peace, where I understand it is eternity.

The pure, the beautiful, the sublime, the non-material where we are free and pure love.

May you be at peace, my Angel Tess, I will love you forever without judging you, just by loving you as you are since you came into our life.

Papa

Onwerkelijk, oneerlijk, niet te begrijpen, in de bloei van haar leven en met grootse plannen voor de toekomst zijn wij plotseling onze allerliefste Tess kwijtgeraakt. Dit afscheid doet zó zeer.
